CSABA BOROS

Email: boros.csaba94@gmail.com | **Web**: www.boroscsaba.com | **LinkedIn:** https://www.linkedin.com/in/boroscsaba/

I solve problems. I'm an experienced, fast learner and enthusiastic backend developer with over 9 years of professional experience mostly with the C# .NET stacks as a freelance developer. I don't shy away from the DevOps and DBA parts of the project either. Part of the top 3% of developers according to Toptal.

WORK HISTORY

Bitstop | Senior Back End Developer   *2022 - present*

Developed and worked on multiple services inside a complex microservice architecture to facilitate handling of cryptocurrency purchases and data management tasks.

Technologies: **ASP.NET Core, REST, CircleCI, Docker, Docker compose, Rabbit MQ, Insomnia**

University of Pittsburgh | Senior Full Stack Engineer   *2023 - present*

Worked on modernizing a legacy ASP.NET WebForm application written in VB. Created complex UIs based on a figma design using Tailwind CSS and Javascript.

Technologies: **JavaScript, ASP.NEW Webforms, Tailwind CSS, IIS, Visual Basic .NET (VB.NET)**

Bethune Consulting | DevOps Engineer   *2022 - present*

Worked on multiple smaller tasks involving creating or fixing CI/CD pipelines, setting up infrastructure in AWS, bug fixes and changes in multiple projects.

Technologies: **React, Amazon S3, CI/CD, Netlify, AWS Route 53, AWS EC2**

Sellff | Senior Full Stack Developer   *2021 - 2022*

Added multiple features to the Sellff business marketplace website, most notably I implemented a feature that allows users to get paid using Stripe Connect for participating in offers created by member companies.

Technologies: **React, .NET Core, SQL Server, Stripe connect**

Atlas Tech Development | Senior Full Stack Developer   *2021 - 2022*

As a full stack engineer I worked and improved on multiple different projects at Atlas: I've set up CI/CD pipelines in Azure devops, implemented secrets management, developed SOAP website with .NET 5, built complex UIs and API using Blazor and .NET, re-wrote and ported applications build in Microsoft Access VB to C#, worked on mobile apps built using Xamarin.

Technologies: **CI/CD, Blazor, .NET 5, SCSS, REST, EF, SQL, Azure DevOps, VB**

Lombiq Technologies Ltd | Software Developer   *2021 - 2022*

Worked on the development of a Visual Studio Extension and implemented new features in various client CMS websites. Also developed UI features using jQuery.

Technologies: **ASP.NET Core, Orchard CMS, jQuery, Javascript**

BCM | Technical Lead   *2014 - 2022*

Planned and coded a complex data migration tool affecting multiple systems. Achieved huge performance gains by profiling and optimizing a very large legacy system. Managed and supervised the work of junior programmers on multiple small and mid-sized projects. Worked on creating a complex Angular-based front-end for a telecommunications network diagram creator tool. Created a project management application using XAF.

Technologies: **SQL, C#, DevExpress, Knockout.js, Angular, ASP.NET MVC**

EDUCATION

Óbuda University | Bachelor of Science (BSc), Computer Software Engineering   *2013 - 2016*
